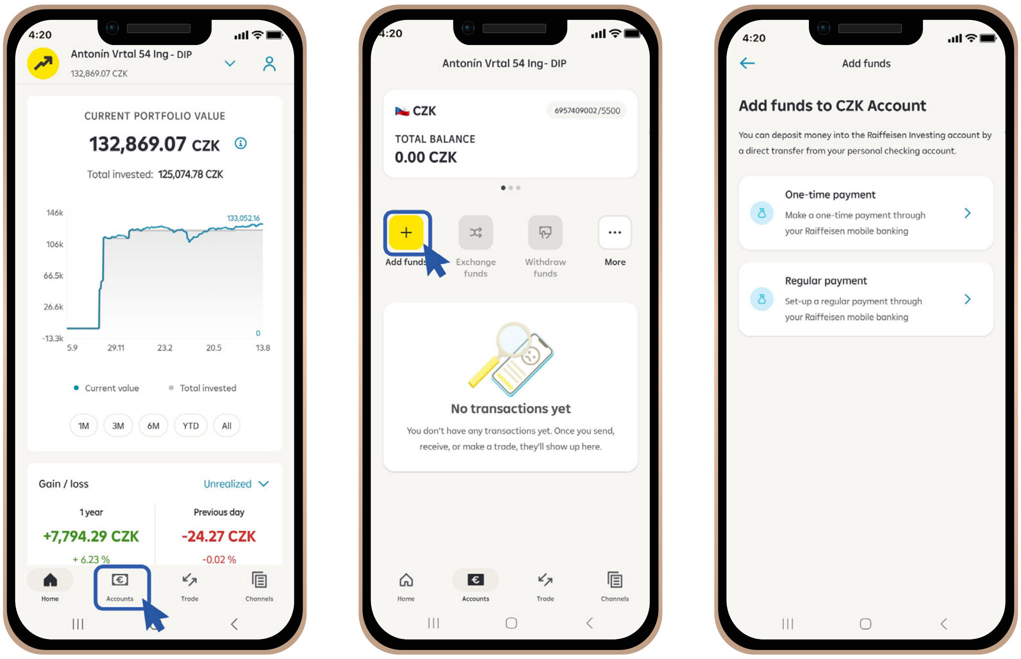
Depositing money in DIP

You can deposit money to your DIP contract easily. Log in to the Raiffeisen Mobile Investing Application, select your DIP contract and click the *Add funds* button in the *Accounts* section. Then, choose one of the following options for fund deposits. You can use a pre-filled one-time or regular payment from your current account and you will be redirected to complete the payment order in your Raiffeisen mobile banking.



TIP: Have a look at specific calculations of various tax savings opportunities based on the amount of your own DIP contributions during the year.

It doesn't matter if you don't save the maximum amount, you will still save money:

Monthly deposit to DIP	Total annual contribution to DIP	Total annual tax savings
500 CZK	6 000 CZK	**900 CZK**
1 000 CZK	12 000 CZK	**1 800 CZK**
2 000 CZK	24 000 CZK	**3 600 CZK**
3 000 CZK	36 000 CZK	**5 400 CZK**
4 000 CZK	48 000 CZK	**7 200 CZK (maximum)**

Searching an investment product

You can use the funds deposited in DIP for investments. To search for investment products and subsequently buy/sell them, please refer to the separate manual available **HERE**.
