Activating the investment application

If you have signed an investment contract, such as a **Small Brokerage Contract**, **Big Brokerage Contract**, or **Asset Management Service Contract**, you can manage it via the Raiffeisen mobile investing app as well.

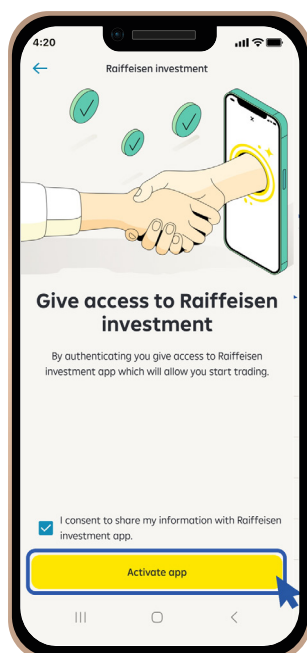

- 1) You can access the application using the activation banner displayed in your Raiffeisen mobile banking in *Menu – Settings – Activate – Raiffeisen investing*. Alternatively, you can directly visit the [App Store](#) or [Google Play](#) depending on the type of your mobile phone and search for the app called *Raiffeisen mobilní investice / Raiffeisen mobile investing*.

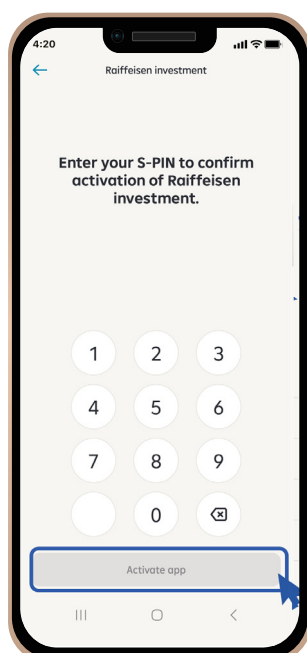

- 2) Continue with the activation of the Raiffeisen mobile investing app.

- 3) To properly pair both applications, you must now consent to the sharing of personal data.

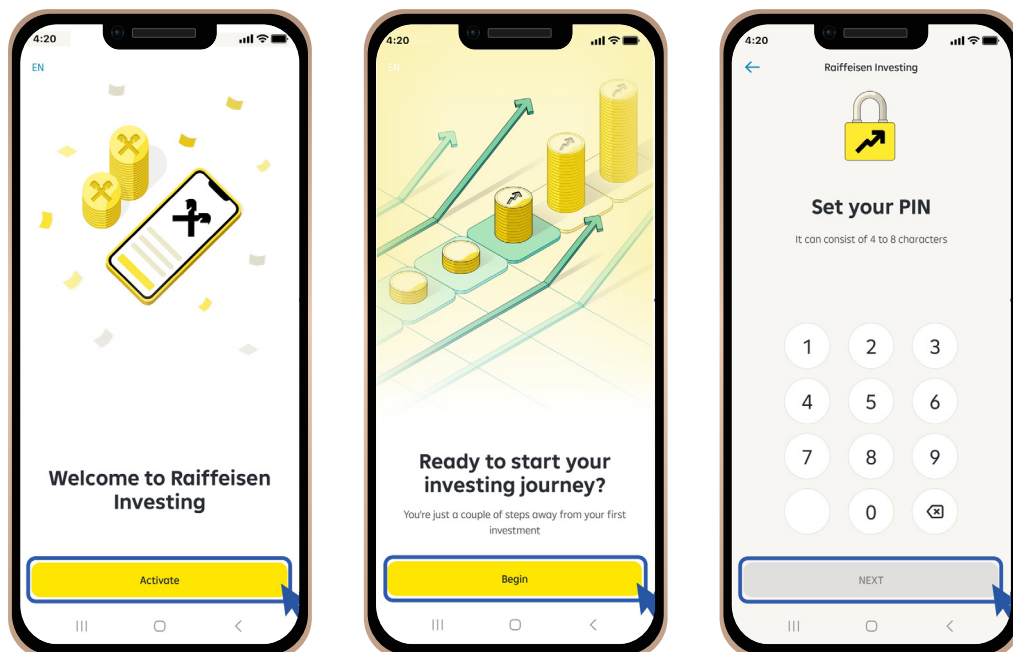

- 4) Confirm the start of activation with the S-PIN you use for confirmations in Raiffeisen mobile banking.

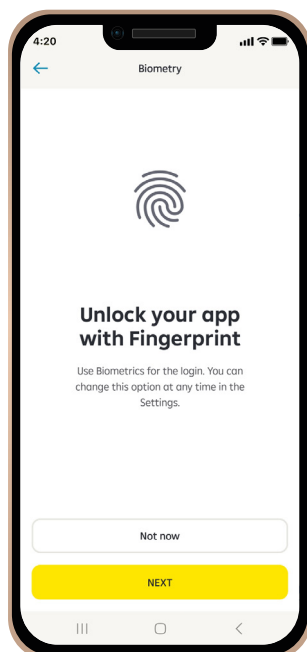

- 5) Continue to the application and create a PIN that will be used to log in and authorize orders placed directly in the Raiffeisen mobile investing application.

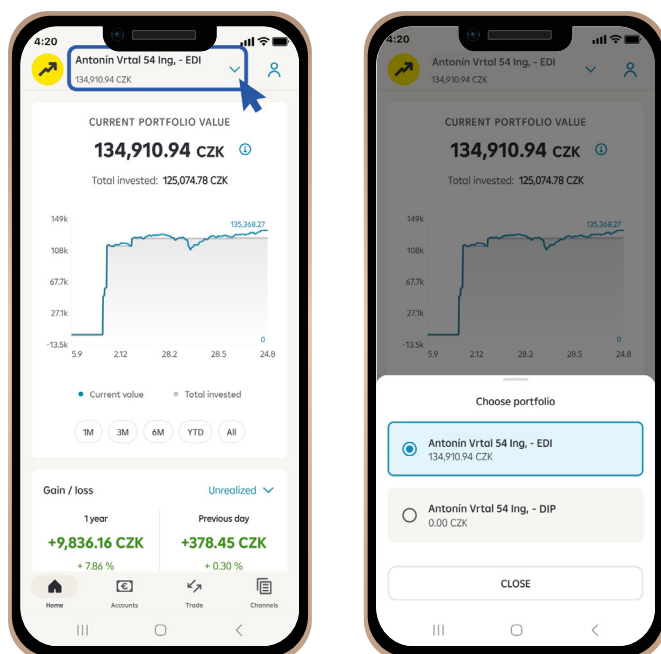

It is not necessary for the chosen PIN to be the same as the one you are already using in Raiffeisen mobile banking.

- 6) You can also use biometric authentication to log in and authorize orders. The type of biometric authentication will depend on the available features of your mobile device.

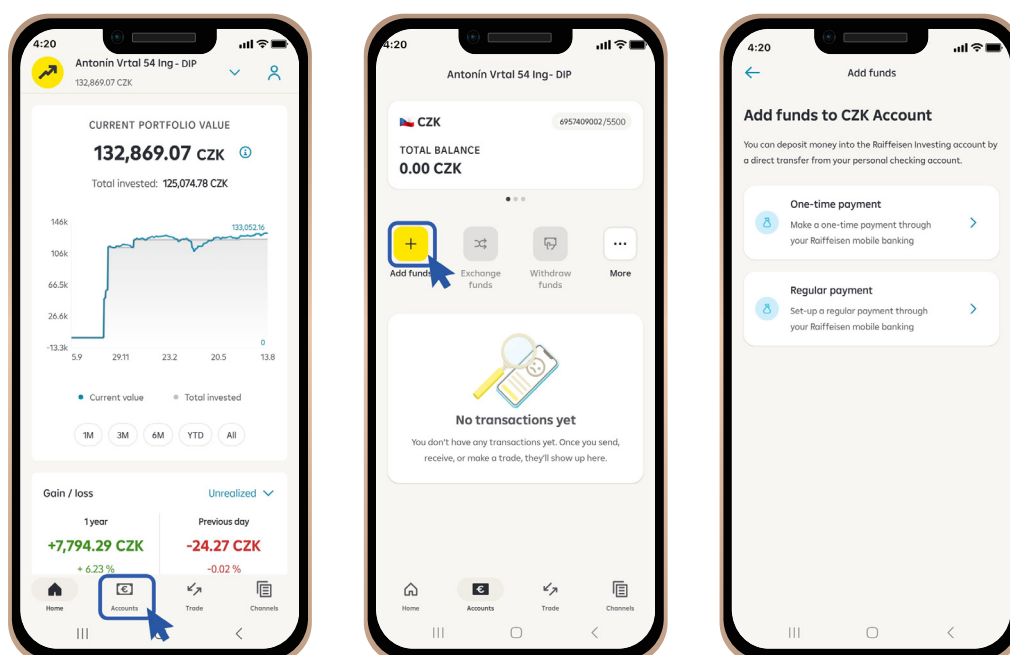

- 7) Then, the application home screen will be displayed. If you already have multiple active investment contracts, you can switch between them in the marked field at the top of the home screen.

Depositing money into an investment account

If you hold a **Big Brokerage Contract**, you can easily deposit your money in the **Accounts** section by clicking **Add funds**. Choose from the following options to deposit funds: You can use pre-filled one-time or regular payments from your current account, and you will be redirected to complete the payment order in your Raiffeisen mobile banking.

Note: If you hold a **Small Brokerage Contract**, the **Accounts** section will be inactive, i.e. you won't see it. In respect of clients investing through such an investment agreement, orders are settled directly from the current account. Clients with an **Asset Management Service Contract** will also not see this section at all.

Searching an investment product

You can use the funds deposited in your investment account for investments. To search for investment products and subsequently buy/sell them, please refer to the separate manual available [HERE](#).
