Remuneration policy (2016 calendar year):

	Annual gross salaries fixed	Annual gross salaries variable	Number of employees
Total amount of the remuneration paid:	2,727,169.43	0.00	91
Managers purs. to §17a Para. 1 Investment Funds Act	329,725.80	0.00	3
Risk bearers purs. to §17a Para. 1 Investment Funds Act	1,087,852.90	0.00	25
Employees with control functions purs. to § 17a Para. 1 Investment Funds Act	181,365.82	0.00	7
Other risk bearers purs. to § 17a Para. 1 Investment Funds Act	0.00	0.00	0
Other employees purs. to § 17a Para. 1 Investment Funds Act	1,128,224.91	0.00	56

No remuneration was paid directly by OGAW/AIF.
The information regarding remuneration was taken from the VERA report.

Description of how remuneration was calculated

Educational qualifications (apprenticeship, A-Levels, university degree, CPM...), length of service, professional experience, special (professional) competence, the concrete (future) assignment and the related and accepted responsibilities are all decisive criteria in the determination of the fixed salary.

Payment according to the collective wage and salary agreement is foreseen for new recruits to the company. Remuneration above this amount is possible subsequently, via function-related bonuses, over- and all-inclusive overtime payments.

In a further step, or in the case of highly qualified new recruits, a special contract may be offered to high achievers. The remuneration above the level of the collective wage and salary agreement thus regulated represents an all-inclusive payment for the (continued) (extra) performance of the employee.

Variable salary components are measured purely on the basis of objective criteria. The primary factor in this connection is the financial result of the entire company, while the secondary criteria applied consist of the attainment of strategic objectives, customer satisfaction, adherence to risk management policy, abidance by internal and external regulations, leadership qualities, teamwork, creativity, motivation, cooperation with other business areas, internal control and corporate functions.

In addition, a yearly performance assessment is undertaken by the employee's immediate superior, which as has a major influence on remuneration development.

Under no circumstances is the attainment of short-term gains through the acceptance of risks taken into account during the assessment of salary payments.

The KEPLER-FONDS KAG business strategy was and is targeted on long-term, solid growth. Apart from expansion in absolute terms, in particular the objective is a continuous increase in market share.

The implementation of this business strategy is directly dependent upon the qualification and motivation of every individual member of the workforce and therefore the competition for the best employees plays a major role.

The entire personnel management (as well as remuneration policy, which is an important sub-area in this regard) is aimed at offering (potential) employees a working environment in which they are prepared to achieve above-average performance.

Apart from an appropriate basic salary, this approach includes a variety of social benefits that are contained in the collective wage and salary or voluntary agreements. These include:

- Health insurance fund subsidies
- Pension fund contributions
- Long-service bonuses
- Subsidised meals / company canteen

as well as flexible working hours, childcare possibilities, the support of basic and further training (A-Levels, university courses, CPM and CFA/CEFA courses), an excellent working climate, short decision-making channels through flat hierarchies, one-off payments in the case of exceptional work, or collective agreement bonuses for long-service, or awards received (various prizes for successful management, etc.).

Result of the audits mentioned in § 17c

The audits carried out by the internal auditing department (4 April 2016) and the remuneration committee (7 December 2016) discovered no irregularities.

Material remuneration policy changes

In line with a resolution of the executive management from 15 November 2016 and the consent of the Supervisory Board granted on 2 December 2016, an adjustment was made to the remuneration policy and now variable payments are only possible up to a material threshold of 25% of the fixed salary, or EUR 30,000.

This new regulation was is yet to be implemented in the 2017 financial year.

Dynamik Invest

Dear unit holder!

KEPLER-FONDS Kapitalanlagegesellschaft m.b.H. has pleasure in presenting the statement of accounts for "Dynamik Invest" - UCIT according to §§ 2 in conjunction with 50 of the IFA 2011 (mutual fund) – for the 6th financial year from 1 May 2016 to 30 April 2017.

For its management work, the management company receives an annual fee to 1.25 % (excluding any result-based fee) of the fund assets.

In the sub-fund a maximum management fee (excl. any result-based fee) of up to 1.40 % may be charged.

Market overview

Between April and June 2016, GDP in the USA rose by 1.4% and at 3.5%, third quarter growth was highly satisfactory. However, in the final quarter of last year growth slowed again and amounted to 2.1%, and this deceleration continued in the first quarter of 2017. From January to March, GDP grew by 0.7% (respective annualized quarterly growth). Analysts anticipate economic growth of 2.2% for 2017 and the unemployment rate remains at a very low level, as exemplified by a figure of 4.4% in April 2017. This represents practically full employment, which is one of the declared objectives of the US Fed. After 2.7% in February, the inflation rate at the end of March stood at 2.4%. In the next ten years, the US government intends to spend USD 1 billion on infrastructure projects. The aim is to modernize roads, bridges, airports, power networks and water systems. The government also plans a reform of the US tax system with the primary intention of easing the burden on companies and the lower income group. In March, the US Federal Reserve increased its key interest rate for the second time in three months. The raise amounted to three-quarters of a percentage point and now the rate lies within a range of 0.75 to 1.0 per cent. In justifying this step, the bank pointed to the positive labour market situation in the US and rising inflation. Moreover, should the economic and labour market situation remain positive, further interest rate increases could follow in 2017.

In the second and third quarters of 2016, Europe experienced moderate GDP of 0.3 and 0.4%. In the final quarter of 2016 and the first quarter of the new year, growth amounted to 0.5% respectively. Owing to the flourishing domestic economy and the strong construction sector, in the first quarter of 2016 Germany saw growth of 0.7%. In the second quarter, GDP rose by 0.5%. Above all, this expansion was borne by exports and both private consumer and government spending. In the third quarter, growth lost impetus and from July to September the economy only gained a mere 0.1%. This slow-down emanated from a fall in exports, but between October and December, German GDP gained 0.4%. This was the result of public sector spending, the construction boom and private consumer expenditure. Growth of 1.6% is forecast for Germany in 2017 as a whole. In April 2017, the unemployment rate in Germany stood at 5.8% and inflation amounted to 2.0%. Owing to the improvement in the global economy, February saw an unexpected increase in German exports, which as opposed to February 2016 were 3.1% up at EUR 102.3 billion.

In France, the mood in industry was brighter than at any point for almost six years. In April, the business climate index was up three points at 108, but by contrast the unemployment rate rose to its highest level for ten months. In March, 3.5 million people in France were without a secure job.

In December 2016, the ECB decided to prolong its bond purchasing programme for another nine months until at least December 2017. However, following this measure, as from April 2017 the bank has only pumped EUR 60 billion into the market instead of EUR 80 billion. Following the cut in March 2016, the key interest rate stands currently at 0%.

In the first quarter of 2016, Japan showed solid growth of 0.7%, although in the second and third quarters the increase in GDP was again smaller, amounting to only 0.4% and 0.1% respectively. Nonetheless, at the end of the past year, the economy grew again by 0.4%. In March, the consumer goods index, excluding fresh foods, which constitutes a special focus of the monetary authorities, rose once more. As a result, for the first time since the end of 2015, this indicator was up for the third time in succession. In March, prices were 0.2 per cent higher as compared to the previous year. The inflation rate is therefore still far removed from the target of the Bank of Japan, which is looking for inflation of 2.0%. In March, Japanese export growth was the strongest in more than two years, rising by 12% over the figure for the same month in 2016. This represented the fourth gain in a row and can be traced to an increase in the exports of automotive components and steel. As usual, the Bank of Japan increased the annual money flow by JPY 80 billion (approx. EUR 658 billion). In addition, the purchases of stock exchange traded funds (ETFs) were raised to JPY 6 billion yearly (approx. EUR 49 billion) and in order to stimulate the weak economy, a separate stimulus package involving around EUR 250 billion was agreed.

Between June and the beginning of August 2016, the oil price declined by some 20% and sank to below USD 42.0 per barrel. The curb on production agreed by OPEC and other producing countries such as Russia led to a price rise towards the end of 2016, but recently this receded slightly. At present, a barrel of North Sea Brent is trading at USD 51.7.

Following a low at the start of 2016, by May the euro recovered and climbed to a year-high of 1.1527 against the dollar. The decision of the UK to leave the EU caused a slight dip, but the common currency bounced back quickly. By the end of 2016, the increase in interest rates in the USA, the prolongation of bond purchases by the ECB and the negative result of the constitutional referendum in Italy prompted a fall in the euro to its lowest level for a year (USD 1.0384). However, recently the common currency gained ground and at present is quoted at USD 1.0901.

Developments in the bond markets

At the end of April, the return on German 10-year government bonds was 0.32% (+5 base points). At the close of the period under report, 10-year US treasury bonds were 45 base points up on the preceding year and offered a return of 2.28%. 10-year Italian government bonds also showed an increase in returns, rising from 1.82 per cent at the end of December 2016 to stand currently at 2.28 per cent. The return on Icelandic government bonds fell sharply, the S&P rating agency having raised the credit rating for the island nation from A- to A.

Having demonstrated a highly satisfactory trend, following the victory of Donald Trump in the November 2016 election, emerging market bonds eased somewhat. However, in the meantime this segment has recovered considerably and all in all achieved solid yearly performance.

High-grade company bonds (AAA – BBB ratings) also developed in a pleasing manner. Strong momentum emanated from the European Central Bank, as its bond purchasing programme also includes corporate bonds and will continue until at least the end of 2017.

High-yield company bonds (BB – CCC ratings) performed extremely well during the period under report and US bonds outstripped their European counterparts. In the USA, the energy sector also recovered somewhat.

Developments in the stock exchanges

Last June, the decision of the British to leave the European Union sent tremors through the stock exchanges with massive, across-the-board price falls. However, the shock waves quickly abated and Donald Trump's unexpected election victory in the US presidential election did not catch the markets as unprepared as was feared. The stock exchanges around the globe slumped in the short-term, but calmed down after only a few days. As compared to the reaction of the markets following Trump's appointment, the failure of the constitutional reform in Italy only prompted a mild response. During the period under report, the Dow Jones Industrial Index gained 17.8% and at the end of April stood at 20,940.5 points. The German DAX was up by 23.9% and currently stands at 12,438.0, while the Nikkei rose by 15.2% to be quoted at 19,196.7 points.

Investment policy

Equities

The main focus of investment in shares was on large-cap companies although small-caps were added to the fund mix. During the period under review, shares in the emerging markets were overweighted at the expense of industrial nation stocks. In the industrial nations since the beginning of the year European and, to a lesser extent, Japanese shares have been overweighted to the detriment of US shares. Currently, the share ratio has a neutral weighting and recently the use of risk-optimized sub-funds increased.

Bonds

Investments in this area focused largely on European bonds. The share of foreign currencies was kept extremely low. Throughout the period under report, threshold country, high-grade and high-yield corporate bonds were to be found in funds. At present, the ratio of government bonds is clearly underweighted.

Alternative Investments

Owing to their advantageous valuation, from February onwards, convertibles were included in funds and during the entire period under report raw material funds were added to the mix.

Notes regarding security financing transactions purs. to EU regulation 2015/2365

The investment fund terms and conditions contain information about the security financing transactions (pension transactions and securities lending) related to this regulation, with the result that basically it is possible for the investment fund to carry out such business.

However, the current strategy of the investment fund neither foresees the completion of pension or securities lending transactions, nor total return swaps or comparable derivative business.

Therefore, owing to a lack of the use of the aforementioned techniques no disclosures are made pursuant to Article 13 in connection with Section A of the annex to EU regulation 2015/2365.

Interest expenditure (incl. negative interest rate) - 588.56

Expenditure

Remuneration of the management company	-	1,009,279.34	
Securities deposit fees	-	25,542.56	
Costs of auditors and tax consultation costs	-	5,251.20	
Publicity and supervision costs	-	3,375.64	
Other management expenses	-	16,913.45	
Portfolio commissions from sub-funds	+	2,977.79	
Performance-related fee	-	29,431.49	- 1,086,815.89

Ordinary fund result (excl. income equalisation) - 203,620.64

Realised exchange result ^{1) 2) 4)}

Realised profits	+	4,451,607.34	
Realised profits from derivative instruments	+	1,521.81	
Realised losses	-	1,412,574.55	
Realised losses from derivative instruments	-	23,070.14	

Realised exchange result (excl. income equalisation) + 3,017,484.46

Realised fund result (excl. income equalisation) + 2,813,863.82

B) Unrealised exchange result ^{1) 2) 4)}

Change in unrealised exchange result + 3,782,167.71

C) Income equalisation

Income equalisation + 123,042.38

Total fund result + 6,719,073.91

¹⁾ Realised profits and realised losses are not period-restricted and are not necessarily related to the price development of the fund in the accounting year.

²⁾ Total exchange result, without income equalisation (realised exchange result without income equalisation, plus changes in the unrealised exchange results)
EUR 6.799.652.17

⁴⁾ The transaction costs entered amount to EUR 16,255.35. Any implicit transaction costs which are not under the sphere of influence of KEPLER-FONDS KAG and the depositary bank are not included in this value.

3. Development of the fund assets		EUR
Fund assets at the beginning of the accounting year ¹⁾	+	77,805,959.59
Payment (for accumulation shares) on 15.07.2016	-	33,784.04
Payment (for accumulation shares IT) on 15.07.2016	-	8,532.41
Change in liquid funds		
Balance of certificate sales and redemptions (excl. Income equalisation)	+	5,746,783.98
Total fund result (the fund result is detailed in point 2.)	+	6,719,073.91
Fund assets at the end of the accounting year ²⁾		90,229,501.03

¹⁾ Shares circulating at the beginning of the accounting year: 5,996.474 accumulation shares; 419.100 accumulation shares IT, 247.530 fully reinvested shares

²⁾ Shares circulating at the end of the accounting year: 6,002.002 accumulation shares; 554.680 accumulation shares IT, 582.580 fully reinvested shares

Statement of assets to 30 April 2016

EXCHANGE RATES

Assets in currencies other than in EUR are converted to EUR at the following exchange rate

Currency	Price
Czech Koruna (CZK)	27.0310
Italian Lire (ITL)	1,936.2700
Japanese Yen (JPY)	121.0200
US Dollars (USD)	1.0876

The special assets are valued on the basis of prices and market rates as at 27 April 2017 or the last known rates.

Rules for asset valuation

The value of one unit is obtained by dividing the total value of the investment fund, including the results, by the number of units issued.

In the case of investment funds with several unit certificate classes the value of one unit in one unit certificate class is obtained by dividing the value of one unit certificate class, including the results, by the number of the units issued in that unit certificate class.

The total value of the investment fund must be determined on the basis of the current market values of the existing securities, money market instruments, shares in investment fund and subscription rights, plus the value of the financial investments, sums of money, credits, receivables and other rights belonging to the investment fund, less liabilities.

The market values of the assets are determined as follows:

- The value of assets which are quoted or traded on a stock exchange or other regulated market is in principle determined on the basis of the last available price.
- If an asset is not quoted or traded on a stock exchange or other regulated market, or if the price of an asset which is quoted or traded on a stock exchange or other regulated market does not reasonably reflect the actual market value, the prices from reliable data providers or alternatively securities or other recognised valuation methods equivalent to market prices are used.
- Shares in a UCITS, UCIs or AIFs are valued at the last available redemption prices, or if these shares are traded on stock exchanges or regulated markets (e.g. ETFs), at the last available closing prices.
- The liquidation value of futures and options which are traded on a stock exchange or on another regulated market is calculated on the basis of the last available settlement price.

In principle, the last published or available prices of the assets acquired by the investment fund are used for calculating the prices of the investment fund. If the last published price quite obviously does not correspond to the actual values, and not only in the individual case, because of the political or economic situation, a price calculation for the investment fund may be waived if it has invested 5% or more of its fund assets in assets which have no prices or market-conforming prices.

KEPLER-FONDS Kapitalanlagegesellschaft m.b.H.

Andreas Lassner-Klein Dr. Robert Gründlinger, MBA Dr. Michael Bumberger

Audit certificate

Report regarding the annual report

Audit opinion

We have audited the annual report received from KEPLER-FONDS Kapitalanlagegesellschaft m.b.H., Linz, regarding the

**Dynamik Invest,
mutual fund,**

this consisted of the asset statement as at 30 April 2017, the income statement for the financial year ending on this closing date and the other information required in accordance with Annex 1, Diagram B of the 2011 Austrian Investment Fund Act.

In our opinion, the annual report corresponds with the statutory regulations and presents a true and fair picture of the company's assets and finances as at 30 April 2016, and of its earnings for the financial year ending on this closing date in accordance with the Austrian Commercial Code and the stipulations contained in the 2011 Austrian Investment Fund Act.

Basis for the audit opinion

We conducted our audit in accordance with § 49 Para 5 of the 2011 Austrian Investment Fund Act and the Austrian principles of orderly auditing, which require the employment of the International Standards on Auditing (ISA). Our responsibilities pursuant to these regulations and standards are further described in the "Auditor's responsibilities for the audit of the consolidated financial statements" section of our report. We are independent of the company within the terms of Austrian company law, professional regulations and the IESBA Code of Ethics and have fulfilled our other professional responsibilities under these ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of the legal representatives and the Supervisory Board for the annual report

The legal representatives of the company are responsible for the preparation of this annual report and that in accordance with Austrian corporate law regulations and the stipulations of the 2011 Austrian Investment Fund Act it presents the truest possible picture of the company's assets and its financial and earnings position. The legal representatives of the company are also answerable for the internal controls that they regard as necessary in order to facilitate the drawing up of an annual report that is free of material misstatement whether deliberate or accidental.

The Supervisory Board is responsible for the monitoring of the company's accounting process with regard to the funds that it administers.

Auditor's responsibilities for the audit of the annual report

The objectives of our audit are to obtain reasonable assurance that the annual report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but not a guarantee that a final audit conducted in accordance with the Austrian principles of orderly auditing, which require the application of ISA, will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in total, they could reasonably be expected to influence the economic decisions of users taken on the basis of this annual report.

As part of an audit in accordance with the Austrian principles of orderly accounting, which require the application of ISA, we exercise professional judgment and maintain a critical approach throughout the planning and performance of the audit.

In addition:

- We identify and assess the risks of material misstatement in the annual report whether due to fraud or error, design and perform audit procedures responsive to these risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is greater than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the overriding of internal controls.

- We obtain an understanding of the internal control system relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal controls.

- We evaluate the appropriateness of the accounting policies used by the legal representatives of the company and the reasonableness of the accounting estimates and related disclosures made.

- We evaluate the overall presentation, structure and content of the annual report, including the disclosures, and whether the report shows the underlying transactions and events in a manner that achieves fair presentation.

- We evaluate the overall presentation, structure and content of the annual report, including the disclosures, and whether the report shows the underlying transactions and events in a manner that achieves fair presentation.

Other information

The legal representatives of the company are responsible for the other information. The other information contains all the information included in the annual report with the exception of the income statement, the other information required in accordance with Annex 1, Diagram B of the 2011 Austrian Investment Fund Act and the auditor's opinion.

Our opinion regarding the annual report does not extend to this information and we offer no assurances in this connection.

In the course of our audit of this annual report, it is our responsibility to study this other information and to consider if material discrepancies exist between the other information, the annual report and the knowledge that we obtained in the course of our audit, or if this information appears to be otherwise materially misstated. On the basis of the work completed, should we come to the conclusion that the other information is materially misstated, we are then obliged to report this fact. We have nothing to report in this regard.

Tax treatment

Please see our website www.kepler.at for detailed information on the fund's tax treatment, prepared on the basis of the audited annual fund report.

valid from June 2012

Fund regulations

The fund regulations for the **Dynamik Invest** investment fund, a mutual fund according to the **Investment Fund Act (InvFG) 2011 in the currently applicable wording** have been approved by the Financial Market Authority (FMA).

The investment fund as a special guideline-conforming asset and is managed by KEPLER-FONDS Kapitalanlagegesellschaft m.b.H. (hereinafter referred to as the "management company") with its registered office in Linz.

Article 1 Co-ownership units

The co-ownership units are incorporated by unit certificates (certificates) in the nature of a security made out in the name of the holder.

The unit certificates are represented in collective certificates for each class of unit. No actual securities may therefore be paid.

Article 2 Depository bank (Custodian)

The depository bank (custodian) appointed by the investment fund is Raiffeisenlandesbank Oberösterreich Aktiengesellschaft, Linz.

The paying agents for unit certificates are the depository bank (custodian) or other paying agents mentioned in the prospectus.

Article 3 Investment instruments and principles

The following assets may be selected for the investment fund according to the InvFG.

According to the market situation or estimate of the fund management the investment fund invests in all types of bonds, shares, certificates, ETFs and shares in investment funds of national and international issues, and in money market instruments and sight deposits or deposits at notice. The proportion of these investment categories may in this vary dynamically. Derivative financial instruments may also be used for hedging purposes and speculatively for investment level control.

– Securities

Securities (including securities with embedded derivative instruments) may be acquired **to the legally permissible extent** provided that the description of the investment fund set out above is complied with.

– Money market instruments

Money market instruments may be acquired **to the legally permissible extent**.

– Securities and money market instruments

The acquisition of securities or money markets not fully paid up and of subscription rights to such instruments or other financial instruments not fully paid up is permissible **up to 10 %** of the fund assets.

Securities and money market instruments may be acquired if they meet the requirements regarding notice or trading on a regulated market or a securities stock exchange according to the InvFG.

Securities and money market instruments which do not meet the criteria mentioned in the previous paragraph may be acquired if they amount in total to **up to 10 %** of the fund assets.

– Shares in investment funds

Shares in investment funds (UCITS, UCI) may be acquired for **up to 20 %** of the fund assets in each fund, provided that the total is **within the permissible legal limit**, and provided that these funds (UCITS and UCI) invest in other investment funds to the extent of no more than **10%** of the fund assets for each fund.

Shares in UCI may be acquired in a total amount of **up to 30%** of the fund assets.

– Derivative instruments

Derivative instruments may be used as part of the investment strategy **to the legally permitted extent** and also for hedging purposes.

– Risk measurement method(s) of the investment fund

The investment fund uses the following risk measurement method:

Commitment approach:

The commitment value is determined according to Chapter 3 of the 4th Derivative Risk Calculation and Reporting Decree in the applicable wording.

The total risk of derivative instruments which are not used for hedging purposes must not exceed **100 %** of the total net value of the fund assets.

Details and explanations can be found in the prospectus.

– **Sight deposits and deposits at notice**

Sight deposits and deposits at notice with a maximum term of 12 months may be held at **up to 100%** of the fund assets.

No minimum bank credit need be kept.

– **Temporary loans**

The management company may take out temporary loans for **up to 10%** of the asset funds for the account of the investment fund.

– **Repurchase agreements**

Repurchase agreements may be used for **up to 100 %** of the fund assets.

– **Securities loan**

Securities loan transactions may be used for **up to 30 %** of the fund assets.

The acquisition of investment instruments is only possible in a uniform manner for the entire investment fund and not for an individual unit class or group of unit classes.

However, this does not apply to currency hedging transactions. These transactions may also be concluded exclusively in favour of a single unit class. Expenditure and receipts relating to a currency hedging transaction are assigned exclusively to the unit class concerned.

More detailed information can be found in the brochure.

Article 4 Conditions for issue and redemption

The unit value is calculated in EUR or in the currency of the particular unit class. More detailed information can be found in the prospectus.

The time of calculation of the unit value coincides with the time of calculation of the issue and redemption price.

– **Issue and issue premium**

The issue price is calculated on every exchange trading day.

The issue price is obtained from the unit value plus a premium per unit amounting to **up to 2,75 %** to cover the issue costs of the management company, commercially rounded to two decimal places.

In principle the issue of the units is not limited, but the management company reserves the right to postpone the issue of unit certificates temporarily or completely.

It is at the discretion of the management company to phase the issue premium.

More detailed information can be found in the prospectus.

– **Redemption and redemption premium**

The redemption price is calculated on every exchange trading day.

The redemption price is obtained from the unit value. At the request of a unit holder his/her share of the investment fund must be paid to him/her at the applicable redemption price on return of the unit certificate.

No redemption premium is levied.

Article 5 Accounting year

The accounting year of the investment is the period from **01.05.** until **30.04.**

Article 6 Unit classes and use of proceeds

Income-distributing unit certificates and/or reinvestment unit certificates with CGT deduction and/or reinvestment unit certificates without CGT deduction may be issued for the investment fund.

Different classes of unit certificates may be issued for this investment fund. The formation of unit classes and the issue of units in a unit class are at the discretion of the management company. More detailed information can be found in the prospectus.

– **The use of earnings in the case of dividend unit certificates**

The earnings accrued during the accounting year (interests and dividends) can be distributed at the discretion of the management company after the costs are covered. A dividend may not be paid, taking into consideration the interests of the unit holders. The same applies to the distribution of income from the sale of assets of the investment fund, including subscription rights, at the discretion of the management company. The payment of dividend from the fund assets and intermediate dividends are permissible.

In no case may the fund assets drop below the legal minimum volume for a termination due to the payment of dividends.

The amounts must be distributed to the holders of unit certificates from **15.07** of the following accounting year, the remainder being carried forward to a new account.

In any case, from **15.07** the amount determined according to the Investment Fund Act must be paid, i.e. the amount which must be used, if necessary, to cover a capital gains tax payment obligation on the dividend-equivalent income from the unit certificate, unless the management company ensures, by providing suitable evidence from the credit institutions, that the unit certificates are, at the time of payment, only held by unit holders who are not subject to Austrian income or corporation tax or are eligible for exemption according to § 94 of the Income Tax Act (ITA) or exemption from capital gains tax.

– **Use of earnings in the case of income-retaining unit certificates with CGT deduction**

The earnings accrued during the accounting year, after the costs are covered, are not distributed. In the case of income-retaining unit certificates, from **15.07**, the amount determined according to the Investment Fund Act must be paid, i.e. the amount of the unit certificate which must be paid, if necessary, to cover a capital gains tax payment requirement on the dividend-equivalent income from the unit certificate, unless the management company ensures, by providing suitable evidence from the credit institutions, that the unit certificates are, at the time of payment, only held by unit holders who are not subject to Austrian income or corporation tax or are eligible for exemption according to § 94 of the Income Tax Act (ITA) or exemption from capital gains tax.

– **Use of earnings in the case of income-retaining unit certificates without CGT deduction (full income retention, Austrian and foreign tranches)**

The earnings accrued during the accounting period, after the costs are covered, are not distributed. No payment is made according to the Investment Fund Act. The determining date for waiving the CGT payment on the annual income is always **15.07** of the following accounting year.

By providing corresponding evidence from the portfolio managing institutions, the management company ensures that the unit certificates are, at the time of payment, held only by unit holders who are either not subject to Austrian income or corporation tax or who are eligible for an exemption according to § 94 of the Income Tax Act (ITA) or exemption from capital gains tax.

If these conditions are not met at the time of payment, the amount determined according to the Investment Fund Act must be paid by crediting the credit institution concerned.

Article 7 Management fee, reimbursement of expenses, processing fee

The management company receives an annual fee for its management activity of up to **1.85 %** of the fund assets calculated on the basis of the month-end values.

Phasing of the management fee is at the discretion of the management company.
More detailed information can be found in the prospectus.

The management company may claim a reimbursement for all the expenses incurred in connection with the management.
More detailed information can be found in the prospectus.

The costs of introducing new unit classes for existing special assets are charged against the unit prices for the new unit classes.

For managing the investment fund the depositary bank receives a fee of **0.50 %** of the fund assets.

Appendix

List of officially trading stock exchanges and regulated markets.

1. Officially trading stock exchanges and regulated markets in the member states of the EEA

According to Article 16 of Directive 93/22/EEC (Securities Service Directive), each member state must keep an up to date list of the markets approved by it. This list must be submitted to other member states and the Commission.

According to this provision the Commission is obliged to publish an annual list of the regulated markets of which it has been notified.

Following the reduced entry barriers and specialisation in the trading segments the list of "regulated markets" has been subject to major changes. In addition to the annual publication of a list in the Official Gazette of the European Union, the Commission will therefore make available an updated version on its official website.

You will find the up to date list of regulated markets at

http://mifiddatabase.esma.europa.eu/Index.aspx?sectionlinks_id=23&language=0&pageName=REGULATED_MARKETS_Display&subsection_id=0¹

1.2 The following stock exchanges are to be included in the list of *Regulated Markets*:

1.2.1 Luxemburg Euro MTF Luxemburg

1.3. **Markets in the EEA recognised according to § 67 (2) Line 2 of the InvFG:**

Markets in the EEA (European Economic Area) which are classified as recognised markets by the competent supervisory authorities.

2. Stock exchanges in European countries outside the member states of the EEA
