

## KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

**Raiffeisen fond evropských akcií, otevřený podílový fond, Raiffeisen investiční společnost a.s.** (hereinafter the "Fund" or the "Feeder Fund")

ISIN: CZ0008475266

The Fund represents a standard feeder fund.

The Investment Company that manages the Fund (the Management Company):

Raiffeisen investiční společnost a.s., Registered Number (IČ): 29146739 (hereinafter also the "Company").

### OBJECTIVES AND INVESTMENT POLICY

The Fund is a dynamic mixed fund. The Fund's investment strategy aims at achieving moderate growth of the capital, by way of investing at least 85 percent of the net asset value in securities issued by its Master Fund (whose performance has been measured in EUR). Furthermore, the Fund may invest (up to 15 percent of its net asset value) in financial derivatives negotiated exclusively for the hedging purposes, and receivables for payment of money out of accounts in the Czech or foreign currencies. The Fund assets without any currency hedging may equal up to 100 percent of the net asset value of the Fund.

The master fund, Raiffeisen-Nachhaltigkeit-Europa-Aktien, is a standard open-end mutual fund managed by Raiffeisen Kapitalanlage-Gesellschaft m.b.H.

The Master Fund invests at least 51 percent of its net asset value in equity and similar securities issued by undertakings with their registered offices or mainly operating in Europe. Also, the Master Fund may invest in further securities, bonds or money-market instruments issued, among others, by governments, corporations, and supranational issuers. The master fund may invest in derivatives, using them for speculations and hedging purposes. At the individual stock level (i.e. not including units in investment funds, derivative instruments and sight deposits or deposits at notice) it exclusively invests in securities and/or money market instruments

whose issuers are classified as sustainable on the basis of social, ecological and ethical criteria. The fund will not invest in certain sectors such as the arms industry or the genetic engineering of corps as well as in companies which violate labour and human rights etc. The total volume of the Fund assets reserved for derivatives that do not serve for hedging amounts up to 60 percent. The master fund is actively managed, and it is not restricted by any reference values. The Fund does not concentrate on any specific industrial branches, sectors or regions. The performance of the Fund is measured in CZK. The Fund is managed actively within an approved investment strategy and it does not intend to copy or follow any specific indexes or benchmarks. The Fund represents a capitalisation fund. More detailed information is available in Chapter 8 of the Fund Prospectus.

The Fund units are usually issued and redeemed on each business day for the current value set on the relevant trading day in accordance with the Fund Prospectus. More detailed information about issues and redemptions of the Fund units is specified in Chapter 13 of the Fund Prospectus.

Recommendation: The Fund may not be suitable for investors planning to recover their invested pecuniary funds within a term shorter than seven years.

### RISK AND REWARD PROFILE

Potentially lower reward			Potentially higher reward →			
← Lower risk			Higher risk →			
1	2	3	4	5	6	7

The Fund is placed in Risk Group 6.

The Synthetic Indicator 1 to 7 takes into account the fluctuation of the value of the units and it shows the potential reward of investments in relation to the degree of risks inherent in the Fund. The higher the number, the higher the potential reward but the less foreseeable the reward, and investors could therefore suffer a loss. However, even the lowest number does not mean that an investment is entirely free of any risk; it rather indicates that, in comparison to higher numbers, the investment offers a lower but more foreseeable reward.

The indicator value was determined based on historical information, which is not always a reliable guide when it comes to the future risk profile of the Fund. The risk and reward indicator is regularly re-assessed and its value can fluctuate up and down.

The Fund risk and reward profile derives from the risk profile of the master fund. The risks to which investors are exposed when investing in this Fund derive, in particular, from investments made by the master fund in higher-risk securities by lower-credit-rating corporations. The risks inherent in the Fund derive, in particular, from market and currency risks. The investors should be prepared to accept the risk of possible loss resulting from their investments in equities and they should be aware of and accept risks of loss related to their investments. The value of investments can rise and fall. No return on such investments is guaranteed. For more information, please, see Chapter 9 of the Fund Prospectus.

## CHARGES

### **One-off charges taken before or after you invest**

**Entry charge** (surcharge, to be charged to the investor)

up to **4 % of the invested amount**

**Exit charge** (deduction, to be charged to the investor)

up to **3 % of the redeemed amount**

This is the maximum amount that might be taken out of investors' money before it is invested or before the proceeds of such investments are paid out; it serves to cover the costs of issuance or redemption of the units of the Fund. In some cases the charge can be lower or zero. Details about the current amounts of the entry and exit charges can be obtained from your financial advisor or distributor or at [www.rfis.cz](http://www.rfis.cz).

### **Charges taken from the Fund over a year**

**Ongoing charge**

**2,61 %**

The ongoing charge covers charges and other payments taken from the Fund assets in respect of the previous financial year ending August 31, 2021 (such costs are reflected in the performance of the relevant investment; they are not charged directly to investors). These figures may vary from year to year.

### **Charges taken from the Fund under special conditions**

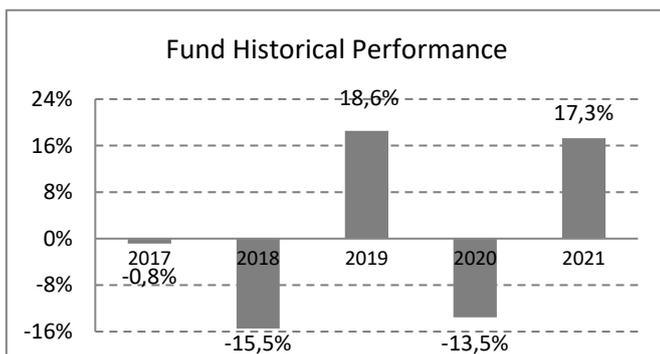

(such costs are reflected in the performance of the relevant investment, they are not billed directly to the investor)

**Performance fee**

up to **20 % of the profit**

The aforementioned charges and costs are used, inter alia, to cover the costs of the operation of the Fund, including any costs of public offerings and promotions, and they reduce potential investment growths. Performance fee of up to 20% from positive economic result before tax for respective accounting period can be applied, due for payment at the end of the period. More detailed information about such charges and costs can be found in Chapter 14 of the Fund Prospectus.

## PAST PERFORMANCE

The determination of historical performance is based on the Fund net asset value and on the assumption that all Fund yields will have been re-invested. Any information on the historical performance of the Fund does not serve as an indicator of future performance. The

determination of the Fund historical performance incorporates all and any fees and costs paid from the Fund assets, with the exception of any potential entry and exit fees (surcharges and deductions) related to the issuance and redemption of the Fund Units. The Fund has existed since 2017. The Fund performance is measured in CZK. More detailed information is available in Chapter 10 of the Fund Prospectus.

The performance of the Fund depends on the performance of its Master Fund (where the Fund invests at least 85 percent of its net asset value and whose performance has been measured in EUR). The Fund's own performance has been measured in CZK. Differences between the performances of the Fund and its Master Fund result, in particular, from currency hedging in respect of the CZK/EUR exchange rate arranged in the portfolio of the Fund (up to 100 percent of the net asset value of the Fund may remain without any currency hedging).
