This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Raiffeisen fond alternativní, otevřený podílový fond, Raiffeisen investiční společnost a.s. (hereinafter the “Fund”)

ISIN: CZ0008474954

The Fund represents a special collective investment fund.

The Investment Company that manages the Fund (the Management Company): Raiffeisen investiční společnost a.s., Registered Number: 29146739 (hereinafter also the “Company”).

OBJECTIVES AND INVESTMENT POLICY

The characteristics of the Fund are that of a mixed investment fund. The Fund invests primarily in some selected segments of the equity markets (e.g., in real estate equity), in commodities, foreign currencies, and/or other instruments whose prices usually fluctuate with lower impact from the development of the main equity indices or bond indices (so-called “Alternative investments”). The Fund may invest in derivatives and it may also apply such derivatives for hedging purposes. Any underlying assets relating to such derivatives may be considered as ‘alternative investments’; it may also appreciate the entrusted funds by way of bank deposits and by investing in bonds.

Such share of “Alternative investments” in the Fund assets will be actively managed; it may form up to 100-percent of the Fund assets in the event of a neutral assessment of the market trends by the Investment Company, and such “Alternative investments” may be completely sold out from

the Fund assets if the Investment Company has an extremely negative view of the market trends. Other funds’ units may form up to 100-percent of the Fund assets.

The Fund does not concentrate on any specific industrial branch, sector or region. The performance of the Fund is measured in CZK. The Fund is a capitalisation fund. The Fund does not intend to copy or follow any specific index or benchmark. More detailed information is available in Chapter 8 of the Fund Prospectus.

Fund units are issued and redeemed usually on each business day for the current value set in accordance with the Fund Prospectus. Further information about unit issues and redemption is specified in Chapter 13 of the Fund Prospectus.

Recommendation: The fund may not be suitable for investors planning to recover their invested pecuniary funds within a term shorter than ten years.

RISK AND REWARD PROFILE

← Potentially lower reward			Potentially higher reward →			
← Lower risk			Higher risk →			
1	2	3	4	5	6	7

The Fund is placed in Risk Group 5.

The Synthetic Indicator 1 to 7 takes into account the fluctuation of the value of the units and shows the potential reward of investments in relation to the degree of risks inherent in the Fund. The higher the number, the higher the potential reward but the less foreseeable the reward, and investors could therefore suffer a loss. However, even the lowest number does not mean that an investment is entirely free of any risk; it rather indicates that in comparison to higher numbers the investment offers a lower but more foreseeable reward.

The indicator value was determined as a combination of historical value variability of the unit and model value

development of the unit based on the assumed allocation of entrusted funds into assets in line with the investment strategy. Data used in the calculation of Synthetic indicator do not have to be a reliable guide when it comes to the future risk profile of the Fund. The risk and reward indicator is regularly re-assessed and its value can fluctuate up and down.

The risks to investor are exposed when investing in this Fund include market risks, currency risks, credit and liquidity risks.

The value of investments can rise and fall. No return on such investments is guaranteed. More detailed information is available in Chapter 9 of the Fund Prospectus.
