Raiffeisen strategie balancovaná, otevřený podílový fond, Raiffeisen investiční společnost a.s. (hereinafter the "Fund").

ISIN: CZ0008475506

The Fund represents a standard fund.

The investment company that manages the Fund (the Management Company): Raiffeisen investiční společnost a.s., Registered number. (IČ): 29146739 (hereinafter also the "Company").

OBJECTIVES AND INVESTMENT POLICY

The Fund's investment strategy is that of a balanced mixed fund. It aims at achieving long-term growth of its capital, measured in the Czech currency. The Fund invests up to 60 percent of the net asset value of the Fund in risk instruments (equity, other instruments bearing equity risk, as well as non-investment-degree bonds or bonds without rating). Furthermore, the Fund will strive to increase the value of its assets via certain conservative instruments (bonds and similar instruments representing the right to repayment of debts or instruments bearing debt security risk, and money-market instruments, with the exception of non-investment-degree bonds or bonds without rating), which will comprise at least 40 percent of the net asset value of the Fund. The sum of the values of all investment instruments denominated in foreign currencies and all balances of pecuniary accounts denominated in foreign currencies may comprise up to 50 percent of the net asset value of the Fund.

The Fund does not concentrate on any specific industrial branch, sector or region. The performance of the Fund is measured in CZK. The Fund is actively managed within the approved investment strategy and does not intend to copy or follow any specific index or benchmark. Specific criteria of social responsible investing (ESG criteria) are not taken into consideration within the investment strategy of the fund. More detailed information is available in Chapter 8 of the Fund Prospectus.

The Fund units are usually issued and redeemed on each business day for the current value set on the relevant trading day in accordance with the Fund Prospectus. The Fund represents a capitalisation fund. For further information about issues and redemptions of the Fund units, please, see Chapter 13 of the Fund Prospectus.

Recommendation: The Fund may not be suitable for investors planning to recover their invested pecuniary funds within a term shorter than five years.

RISK AND REWARD PROFILE

← Potentially lower reward			Potentially higher reward →			
← Lower risk			Higher risk →			
1	2	3	4	5	6	7

The Fund is placed in Risk Group 4.

The Synthetic Indicator 1 to 7 takes into account the fluctuation of the value of the units and it shows the potential reward of investments in relation to the degree of risks inherent in the Fund. The higher the number, the higher the potential reward but the less foreseeable the reward, and investors could therefore suffer a loss. However, even the lowest number does not mean that an investment is entirely free of any risk; it rather indicates that, in comparison to higher numbers, the investment offers a lower but more foreseeable reward.

The indicator value was determined based on historical information, which is not always a reliable guide when it

comes to the future risk profile of the Fund. The risk and reward indicator is regularly re-assessed and its value can fluctuate up and down.

The risks inherent in the Fund derive, in particular, from market, currency, interest rate, credit and liquidity risks. The investors should be prepared to accept the risk of possible loss resulting from their investments in equities and they should be aware of and accept risks of loss related to their investments. The value of investments can rise and fall. No return on such investments is guaranteed. For more information, please, see Chapter 9 of the Fund Prospectus.

HISTORICAL PERFORMANCE

The determination of historical performance is based on the Fund net asset value and on the assumption that all Fund yields will have been re-invested. In view of the date of the

establishment of the Fund, no sufficient data are currently available (i.e., at least in respect of one calendar year) that could provide investors with a useful picture of the performance of the Fund so far. Due to this reason the present chart does not contain any information about the historical performance of the Fund. Any information on the historical performance of the Fund does not serve as an indicator of future performance.
