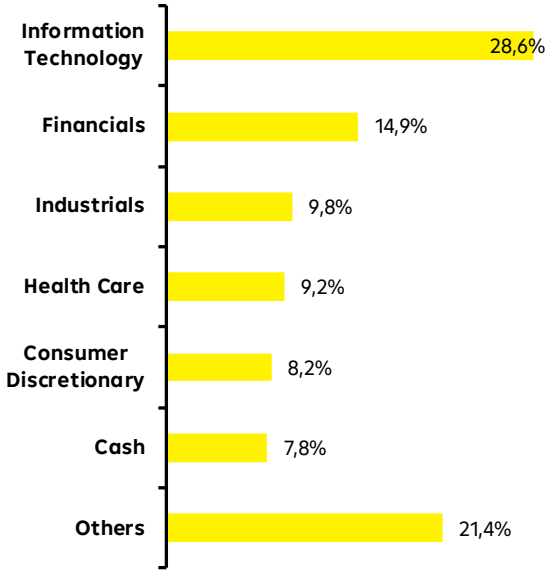
Master Fund Sector Structure



Portfolio Manager Comment

October brought heightened volatility to financial markets amid concerns over returns on massive investments in artificial intelligence and ongoing geopolitical tensions. Brent crude oil prices rose by more than 19%, increasing the risk of persistent inflationary pressures.
The global MSCI ACWI equity index declined by 1.7%. The US S&P 500 lost 0.9%, while the European Euro Stoxx 600 gained 1.9%. Emerging markets performed significantly worse (-8.1%). In the US, information technology (-6.8%) and communication services (-15.2%) underwent a correction, while energy (+14.0%) and consumer staples (+11.4%) posted strong gains.
Bond markets generally advanced. US government bonds gained 2.4%, while the Bloomberg Czech Govt All >1Y aggregate index of Czech government bonds ended the month virtually unchanged. October's performance highlighted the importance of portfolio diversification. While technology stocks underwent a correction, other sectors and high-quality bonds offered positive returns and new investment opportunities.
